**A Specialty Program of Pediatric
Neuropsychology: Child Development Center**

Learning begins in the womb and continues throughout life. Infants and young children have a tremendous capacity to learn and gain knowledge prior to formal schooling. Neuroscience advances and technology have resulted in an increased understanding of brain development and learning during infancy and early childhood.

EARLY CHILDHOOD YEARS ARE MAGICAL.

MISSION

“CHERISHING EACH CHILD WITH COMMITMENT TOWARD BRAIN DEVELOPMENT AND LEARNING”

VISION

CONTINUED GROWTH AS A NEUROSCIENCE HEALTH PROGRAM, ADVANCING REASONED AND COMPASSIONATE KNOWLEDGE ABOUT CHILD DEVELOPMENT AND LEARNING, PROMOTING THE QUALITY OF LIFE OF CHILDREN

VALUES

RESPECT-CHILD DEVELOPMENT-POTENTIAL-SOCIAL CONCERN-
INTEGRITY-EXCELLENCE

PROFESSIONAL INTERDISCIPLINARY STAFF

OFFICE OF DR. VAL NOWINSKI AND ASSOCIATES

**PEDIATRIC NEUROPSYCHOLOGY/CHILD
DEVELOPMENT SPECIALISTS**

The Neuroscience Learning Initiative creates a very comfortable pediatric setting. Optimal learning requires relaxed alertness, which is a necessary step toward healthy development, especially during the first 5 years of life. Your child's growth and development is evidence of the power of human potential!

FUN WITH LEARNING

0 - 3 Years 3 - 5 Years

Brain- Based Early Child Development and Learning Programs
